

What is Charting the LifeCourse?

The Charting the LifeCourse (CtLC) framework was created to help individuals and families of all abilities and all ages develop a vision for a good life, think about what they need to know and do, identify how to find or develop supports, and discover what it takes to live the lives they want to live. The framework is the keystone for supporting a community of learning that champions transformational change through knowledge exchange, capacity building and collaborative engagement.

Core Belief: *All people have the right to live, love, work, play and pursue their own life aspirations.*
